An Elevator Pitch is a short speech with a duration between 60 seconds and two minutes, that not only allows represents a brief proposal of business, but also has many scenarios where it can be utilized, as mentioned above until including in a job interview. This compact format is very appropriate because this is the form in which big corporations works in actuality in base at the phrase " time is money"; this is because to be a short

version but clear allows communicate ideas with most clarity and accuracy. This model is divided into four parts:

1. Introduction: Consists in connect with the audience exposing them personal information they will be relevant for the theme you will be presenting, usually has a duration of ten or fifteen seconds roughly that does not seek give a detailed image of oneself rather, catch fast the attention of the people.

2. Proposal: This part consists to explain customer which opportunity area did you detected or right, which innovator idea did you present to get better something already exists.

3. Solution: From here you did make it clear which it makes you different about others, which is the attractive in your proposals. which the reason because them needs above the competence.

4. Actions: Finally, you explain exactly how you're going to the promised result in the previous point.

In conclusion, the elevator pitch allows to catch fastly the attention of the audience for convey the value proposal and take the plunge to this deepen in it.
